

MIGUEL ATHIE

Backend-leaning Software Engineer

Mexico City, MX | Mexico / Spain | miguel.athien@gmail.com | +52 55 3900 3599 | <https://github.com/MikeAthie>

SUMMARY

Backend-leaning Software Engineer with strong end-to-end ownership building production APIs, data systems, AI-native workflows, and async service architectures. Experienced with Python, FastAPI, PostgreSQL, Redis, workers, JavaScript/TypeScript, and Go-based backend services.

TECHNICAL SKILLS

Backend / APIs: Python, FastAPI, Django, Go, REST APIs, service architecture
Data & async systems: PostgreSQL, Redis, Redis Streams, Celery, workers, event-driven pipelines
AI engineering: RAG, LangGraph, agentic workflows, LLM integration, grounded outputs
Frontend / product: React, Next.js, TypeScript, dashboards, internal tools
Reliability: Prometheus, observability, retries, dry-run workflows, testing, debugging

SELECTED EXPERIENCE

Grey Cross Developments - Product Engineer

Jul 2022 - Present

- Owned backend products end to end, from discovery and architecture through implementation and deployment.
- Designed APIs and service boundaries with maintainable interfaces and production-minded iteration.
- Built async and event-driven pipelines using PostgreSQL, Redis, workers, and structured data flows.

Vittahouse - Automation & Data Consultant

Oct 2019 - Nov 2025

- Automated accounting and audit workflows, reducing manual effort and improving recurring operational consistency.
- Built discrepancy-detection and normalization workflows to surface data issues earlier.

PROJECTS

ForgeGraph - AI-native backend platform for agentic workflows (Go + Django)

2026 - Present

- Built backend services for structured project knowledge, memory, summaries, operational workflows, retries, dry-run execution, and admin-facing endpoints.
- Added reliability features including Prometheus counters, retry mechanisms, structured service boundaries, and tests around critical workflows.

Lex Toolkit - AI agents for legal workflows (Next.js + FastAPI)

Nov 2025 - Present | <https://github.com/MikeAthie/Lex-Toolkit>

- Built a full-stack application with Next.js and FastAPI for professional law-practice workflows.
- Developed AI agent use cases for law practice operations with product-quality delivery and clear API contracts.

EDUCATION

- Instituto Tecnológico Autónomo de México (ITAM) - BSc in Law - 2017
